## **Section 2: EX-99.1 (EX-99.1)**

**Exhibit 99.1**

### **Foresight Energy LP Reports Second Quarter 2019 Results**

#### **Second Quarter 2019 Highlights:**

- Coal sales of \$224 million on sales volumes of 5.0 million tons
- Adjusted EBITDA of \$45.1 million
- 5.4 million tons produced
- Net loss of \$33.7 million, or (\$0.23) per common unit and subordinated unit

ST. LOUIS, Missouri — (BUSINESS WIRE) — August 7, 2019 — Foresight Energy LP (“Foresight” or the “Partnership”) (NYSE: FELP) today reported financial and operating results for the second quarter ended June 30, 2019. Foresight generated second quarter coal sales revenues

of \$224.5 million on sales volumes of 5.0 million tons, resulting in a net loss of \$33.7 million, and Adjusted EBITDA of \$45.1 million. Production was strong with the mines safely and efficiently producing 5.4 million tons during the quarter.

“Overall coal demand continues to be affected by mild temperatures and very low natural gas prices. In particular, our export markets experienced declining pricing as well as logistical difficulties owing to high river levels and swift currents near the port facilities. These factors presented significant challenges to our second quarter 2019 results,” remarked Mr. Robert D. Moore, Chairman, President, and Chief Executive Officer. “To compete in this challenging market, we continue to pursue additional outlets for our production volumes, we reduced planned capital spending for the remainder of 2019, and we continue to focus on maintaining our low cost structure so as to maintain financial flexibility and preserve liquidity.”

### **Second Quarter Consolidated Financial Results**

Coal sales totaled \$224.5 million for the second quarter 2019 compared to \$270.0 million for the second quarter 2018, representing a decrease of \$45.5 million, or 16.9%. The decrease in coal sales revenues was driven by a nearly 15%, or approximately 1.0 million ton, decrease in tons sold combined with a decrease in coal sales realizations of 2.5%, or \$1.17 per ton sold. The decreases in coal sales volumes and realizations were the result of reduced export sales due to challenging river conditions and depressed export market pricing.

Cost of coal produced was \$122.2 million for the second quarter 2019 compared to nearly \$137.0 million for the second quarter 2018. The decrease in cost of coal produced was due to an overall decrease in produced tons sold offset by an increase in the cash cost per ton sold. The increase in cash cost per ton sold was primarily related to sales volumes.

Transportation costs decreased approximately \$9.2 million from the second quarter 2018 to the second quarter 2019 because of a decrease in produced tons sold during 2019 and a larger percentage of our sales going to the export market during 2018, which have higher associated transportation and transloading costs. These decreases were slightly offset by increased costs owing to high river levels at the export facility near New Orleans.

The decrease in selling, general and administrative expense during the second quarter 2019 was primarily due to decreased sales and marketing expenses resulting from lower sales volumes and legal expenses incurred in the prior year period associated with the Hillsboro and Macoupin litigation matters settled in October of 2018.

Interest expense during the second quarter 2019 was comparable to interest expense during the second quarter 2018 primarily as a result of lower overall outstanding principal balances offset by additional outstanding borrowings on our revolving credit facility.

Adjusted EBITDA was \$45.1 million for the second quarter 2019 compared to \$104.1 million for the second quarter 2018. The decrease in Adjusted EBITDA was due primarily to the receipt of \$44.1 million of insurance proceeds in the prior year period, plus the decreased sales volumes and lower coal sales realization per ton in the current year period.

During the second quarter 2019, Foresight used \$8.3 million in cash flows from operations and ended the quarter with nearly \$3.0 million in cash on hand. Available borrowing capacity under the revolving credit facility, net of outstanding borrowings and letters of credit, was \$44.7 million as of June 30, 2019. Capital expenditures for the second quarter 2019 totaled \$26.9 million compared to \$15.7 million for the second quarter 2018. The increase in capital expenditures was primarily the result of the completion of a new portal facility at the Sugar Camp complex and the resumption of mining activity at Hillsboro's Deer Run Mine, including the development of a longwall panel.

### **Guidance for 2019**

Based on Foresight's contracted position, recent performance, and its current outlook on pricing and the coal markets in general, the Partnership is affirming and updating the following guidance for 2019:

*Sales Volumes* – Based on current committed position and expectations for 2019, Foresight is projecting sales volumes to be between 21.0 and 22.0 million tons, with over 6.0 million tons expected to be sold into the international market.

*Adjusted EBITDA* – Based on the projected sales volumes and operating cost structure, Foresight currently expects to generate Adjusted EBITDA in a range of \$240 to \$270 million.

*Capital Expenditures* – Total 2019 capital expenditures are estimated to be between \$75 and \$85 million.

### **Forward-Looking Statements**

This press release contains “forward-looking” statements within the meaning of the federal securities laws. These statements contain words such as “possible,” “intend,” “will,” “if” and “expect” and can be impacted by numerous factors, including risks relating to the securities markets, the impact of adverse market conditions affecting business of the Partnership, adverse changes in laws including with respect to tax and regulatory matters and other risks. There can be no assurance that actual results will not differ from those expected by management of the Partnership. Known material factors that could cause actual results to differ from those in the forward-looking statements are described in Part I, “Item 1A. Risk Factors” of the Partnership's Annual Report on Form 10-K filed on February 27, 2019. The Partnership undertakes no obligation to update or revise such forward-looking statements to reflect events or circumstances that occur, or which the Partnership becomes aware of, after the date hereof.

## Non-GAAP Financial Measures

Adjusted EBITDA is a non-GAAP supplemental financial measure that management and external users of the Partnership's consolidated financial statements, such as industry analysts, investors, lenders and rating agencies, may use to assess:

- the Partnership's operating performance as compared to other publicly traded partnerships, without regard to historical cost basis or, in the case of Adjusted EBITDA, financing methods;
- the Partnership's ability to incur and service debt and fund capital expenditures; and
- the viability of acquisitions and other capital expenditure projects and the returns on investment of various expansion and growth opportunities.

The Partnership defines Adjusted EBITDA as net income (loss) before interest, income taxes, depreciation, depletion, amortization and accretion. Adjusted EBITDA is also adjusted for equity-based compensation, losses/gains on commodity derivative contracts, settlements of derivative contracts, contract amortization and write-off, a change in the fair value of the warrant liability and material nonrecurring or other items, which may not reflect the trend of future results. As it relates to commodity derivative contracts, the Adjusted EBITDA calculation removes the total impact of derivative gains/losses on net income (loss) during the period and then adds/deducts to Adjusted EBITDA the amount of aggregate settlements during the period. Adjusted EBITDA also includes any insurance recoveries received, regardless of whether they relate to the recovery of mitigation costs, the receipt of business interruption proceeds, or the recovery of losses on machinery and equipment.

The Partnership believes the presentation of Adjusted EBITDA provides useful information to investors in assessing the Partnership's financial condition and results of operations. Adjusted EBITDA should not be considered an alternative to net (loss) income, operating income, cash flow from operations, or any other measure of financial performance presented in accordance with U.S. GAAP, nor should Adjusted EBITDA be considered an alternative to operating surplus, adjusted operating surplus or other definitions in the Partnership's partnership agreement. Adjusted EBITDA has important limitations as an analytical tool because it excludes some, but not all, of the items that affects net (loss) income. Additionally, because Adjusted EBITDA may be defined differently by other companies in the industry, and the Partnership's definition of Adjusted EBITDA may not be comparable to similarly titled measures of other companies, the utility of such a measure is diminished. For a reconciliation of Adjusted EBITDA to net (loss) income, please see the table below.

This press release references forward-looking estimates of Adjusted EBITDA projected to be generated by the Partnership during the year ending December 31, 2019. A reconciliation of estimated 2019 Adjusted EBITDA to U.S. GAAP net income (loss) is not provided because U.S. GAAP net income (loss) for the projection period is not practical to assess due to unknown variables and uncertainty related to future results. In recent years, the Partnership has recognized significant asset impairment charges, transition and reorganization costs, losses on early extinguishment of debt, and debt restructuring costs. While these items affect U.S. GAAP net income (loss), they are generally excluded from Adjusted EBITDA. Therefore, these items do not materially impact the Partnership's ability to forecast Adjusted EBITDA.

## About Foresight Energy LP

Foresight is a leading producer and marketer of thermal coal controlling nearly 2.1 billion tons of coal reserves in the Illinois Basin. Foresight currently operates two longwall mining complexes with three longwall mining systems (Williamson (one longwall mining system) and Sugar Camp (two longwall mining systems)), one continuous mining operation (Macoupin) and the Sitran river terminal on the Ohio River. Additionally, Foresight has recently resumed continuous miner production at its Hillsboro complex and continues to evaluate potential future mining options. Foresight's operations are strategically located near multiple rail and river transportation access points, providing transportation cost certainty and flexibility to direct shipments to the domestic and international markets.
